Derrick,

Good morning, I am working on characterizing Frac Tank 506 and Tanker Truck 408. I believe we ran TCLP metals on TT408 to determine whether or not the material would fail for a few metals. Do we have that analysis back yet? Secondly, FT506 had some detection limit issues on pesticides. If my memory serves me correctly someone was going to talk to the lab about cleaning those samples up. Did we ever get anywhere with that? If I can get a response on those two items I can move forward with characterization.

Thanks,

Beth Crawford
